EXPERIENCE

Capital One

Principal Software Engineer

Nov 2017 – Present

- Architected and developed parts of a daily-run data pipeline helping save Capital One millions of dollars.
- Saved the company over \$1 million per year in AWS costs by rearchitecting the code and infrastructure.

Team Lead

Feb 2018 – Jan 2020

- Architected and led the team to gradually move data from a 3rd party legacy application into a microservice; thus, giving power to the users to update and reference the data in question.
- Refactored and optimized microservice so the API response times improved 200%.
- Helped raise engineering standards within the line of business (LOB) by implementing engineering best practices within the team (e.g. CI/CD), mentoring early career software engineers, and helping interview new talent.

Notch (*Acquired by Capital One*)

Data Engineer

Mar 2017 – Oct 2017

- Created a Spark job to migrate over \$9 trillion worth of Capital One spend and rewards data from their mainframe system to S3, MongoDB, and Cansandra in the cloud.

Data Scientist

Feb 2017 – Apr 2017

- Helped develop a k-means model of 13 million row dataset using Spark.
- Created multiple machine learning models using supervised learning on Salesforce data.

Lead Engineer

Nov 2015 – Feb 2017

- Collaborated with a team of designers, product managers, and product owners to create a machine learning based health and wellness app that grew the startup client's valuation to \$10 million.
- Architected and created platform to hand-groom decision trees that also solved the cold start problem.

Maxx Potential

Lead Engineer

July 2014 – Aug 2015

- Led a team of developers to create web/iOS/android apps for a Brazilian peer-to-peer money transfer platform.
- Architected, created, and maintained a RESTful API for internal consumption by android and iOS apps the supporting the AWS infrastructure and CI/CD pipeline.

Analytics Analyst

May 2014 – July 2014

- Implemented Google Analytics event tracking and A/B testing for Medstar group of hospitals and its affiliates.

RESEARCH

Monarch Butterfly Conservation | *Lead Author*

June 2020 – Present

- Collaborating with a team of researchers from Emory, Stanford, and Vanderbilt to train a deep neural network (unet) to predict the number of butterflies in images of monarch butterfly clusters.
- Analyzing the model predictions of the test images.
- Troubleshoot and fixed bugs in the model and the training pipeline.

VOLUNTEER

Kennedy Children's Center

Board of Directors

Sept 2020 – Present

Jersey City Council

Data Consultant

May 2020 – Present

Hoboken Volunteer Ambulance Corps

Bachelor of Science in Aerospace Engineering

Aug 2019 – Present

AWARDS

Technology Builder

Margret Lyn McDermond Award

Oct 2013

EDUCATION

University of Virginia

Bachelor of Science in Aerospace Engineering

Aug 2009 – May 2013

TECHNICAL SKILLS

Languages: Java, Python, SQL, Golang, PHP, Rust, Dart, Swift, JavaScript, HTML/CSS, dotnet, R

Frameworks: Spark, Tensorflow, Java Spring, Cucumber, Drools, Hugo, Laravel, Flask, Django, Flutter, React Native

Developer Tools: AWS, Git, Docker, AWS, Jenkins, Linux, Terminal/CLI, Postgres, MongoDB, Cassandra, Kafka

Other: monolith to microservice migrations, data migrations, jira, and agile project management
